Summary

Graduated in Computer Engineering from ENSEEIHT, I have developed a solid expertise in software engineering and system architecture through a rigorous academic background and targeted professional experiences. Passionate about designing high-performance, scalable solutions, I am seeking a software engineering position to contribute to impactful projects and the success of your organization.

Experience

- CGI** | *Java 17, Spring Boot, React, Redux, PostgreSQL, GitHub, CI/CD, REST APIs* Since Mar 2025
- Participated in the **design, development, and maintenance** of multiple applications for **Société Générale**, in a **multi-project, CDI context**.
 - Developed **backend with Spring Boot** (Spring Data, Spring Batch, ...) exposing **REST APIs**, and **frontend with React.js and Redux**.
 - Integrated **authentication mechanisms based on SgSignIn** and ensured compliance with **Société Générale IT security standards**.
 - Managed versions and continuous deployments via **JFrog Artifactory** and **DevOps Manager** across multiple environments.
 - Worked in a **Agile methodology** (sprint planning, reviews, retrospectives), with **regular demos to business teams** and source code management via **GitHub**.

Projects

- Ecom Microservices System** | *Java 17, Spring Boot 3.2.5, Spring Cloud, Spring Security*
- Designed and developed a microservices architecture to manage clients, products, and invoices, including Eureka Discovery services and a reactive API Gateway.
 - Implemented inter-service REST communication via OpenFeign with fallback and fault tolerance using Resilience4j.
 - Integrated a centralized configuration server (Spring Cloud Config) and automated change propagation via Spring Cloud Bus and RabbitMQ.
 - Exposed CRUD REST endpoints, documented with OpenAPI, and prepared the system for production with observability and OAuth2 security.
- Event-Driven Mini-System (Kafka-lite)** | *Java 17, Spring Boot, Kafka, REST, Docker, Logging/Monitoring*
- Developed an asynchronous notification system based on Kafka, demonstrating knowledge of event-driven architecture and scalability.
 - Implemented a REST producer to generate events and a Spring Boot consumer to process and store these events.
 - Managed basic logging and monitoring to ensure traceability and reliability of the event flow.

Education

Toulouse INP ENSEEIHT | *Bachelor's in Computer Engineering* 2022-2025
CPGE - Lycée Moulay Youssef | *Mathematics, Physics & Industrial Sciences* 2020-2022

Skills

Languages: Java, Python, JavaScript, C, SQL, HTML/CSS, Bash, JSX...
Tools: Spring Boot, GitHub, Redux, Jenkins, Maven, Docker, Scrum, IntelliJ, Kubernetes, Kafka
Learning: AWS, Ansible, Terraform, NodeJs, ...

Languages

English: C1+ (Cambridge certificate) | **French:** Bilingual | **Arabic:** Native | **Spanish:** Beginner
